EDITORS AND EDITORIAL ADVISERS

Editor
JOHN K. GILBERT
University of Reading, UK

Regional Editors
BEVERLEY BELL
University of Waikato, New Zealand

GAALEN ERICKSON
University of British Columbia

Assistant Editor
KATE JOHNSTON
University of Liverpool, UK

Consultant Editor
RICHARD KEMPA
University of Keele, UK

Authors in Australasia should send manuscripts to:

Dr Beverley Bell,
Centre for Science & Mathematics Education Research,
University of Waikato,
Hamilton,
Aotearoa New Zealand

Authors in USA and Canada should send manuscripts to:

Dr Gaalen Erickson,
Department of Mathematics & Science Education,
Faculty of Education,
University of British Columbia,
Vancouver, BC V6T 1Z4,
Canada

Manuscripts from elsewhere, and general editorial correspondence, should be sent to:

Professor John K. Gilbert,
Department of Science & Technology Education,
University of Reading,
Bulmershe Court,
Earley,
Reading RG6 1HY,
UK

The receipt of all manuscripts will be promptly acknowledged. The Editor's decision will be sent to the first named author when the process of refereeing is completed. At that time, the first-named author on a paper accepted for publication will be required to produce two hard copies and a computer disc containing the text laid out in a specified format.

Subscription Information

International Journal of Science Education (ISSN 0950–0693) is published monthly, except in February, May, August, and November (total of 8 issues), by Taylor & Francis Ltd, 1 Gunpowder Square, London EC4A 3DE, UK. Tel: +44 (0)171 583 0490; fax: +44 (0)171 583 0581.

Annual subscription 1997 £315, $520. Personal subscription 1997, £110, $210. Personal subscriptions are available to home addresses only, and must be paid for by personal cheque or credit card.

Periodical postage paid at Jamaica, NY 11431, USA. US postmasters: send address changes to *International Journal of Science Education*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003, USA. Air freight and mailing in the USA by Publications Expediting Inc.

Typeset by Keyword Publishing Services Ltd, and printed in the UK by Henry Ling Ltd, at the Dorset Press, Dorchester, Dorset. The paper used in this publication is 'acid-free' and conforms to the American National Standards Institute requirements in this respect.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan, and Australasia at no extra cost. Subscriptions are entered on an annual basis, i.e. from January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (AMEX, VISA, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributors: **India** Universal Subscription Agency Pvt. Ltd, 101–2 Community Centre, Malviya Nagar Extn, Post Bag No. 8, Saket, New Delhi 110017; **Japan** Kinokuniya Co. Ltd, Journal Department, PO Box 55, Chitose, Tokyo 156; USA, **Canada and Mexico** Taylor & Francis Inc., 1900 Frost Road, Suite 101, Bristol, PA 19007, USA; UK **and all other territories** Taylor & Francis Ltd, Rankine Road, Basingstoke RG24 8PR, UK.

All advertisement enquiries to: (World, excluding USA/North America) Di Owen Marketing, 15 Upper Grove Road, Alton, GU34 1NW, UK. Tel/fax. +44 (0)1420 89142; or (USA/North America) Angela Vizzoni, Advertising Department, Taylor & Francis Inc., 1900 Frost Road, Suite 101, Bristol, PA 19007, USA. Tel: +1 215 785 5800; fax: +1 215 785 5515, e-mail: avizzoni@tandfpa.com

Vol. 18 No. 1 January–February 1996

GENERAL ARTICLE

Beliefs about science and beliefs about language
Clive Sutton 1

RESEARCH REPORTS

Children's ideas about ecology 2: ideas found in children aged 5–16 about the cycling of matter
John Leach, Rosalind Driver, Philip Scott and Colin Wood-Robinson 19

Conceptual links between Cognitive Acceleration through Science Education and Motivational Style: a critique of Adey and Shayer
Elizabeth L. Leo and David Galloway 35

Does motivation style explain the CASE differences? A reply to Leo and Galloway
Philip Adey 51

On an apparently simple modelling problem in biology
Ray C. Paton 55

Teaching science process skills
Peter N. Brotherton and Peter F. W. Preece 65

A hierarchical model of the development of student understanding of momentum
Ted Graham and John Berry 75

The use of mother tongue and English in the learning and expression of science concepts: a classroom-based study
Marissa Rollnick and Margaret Rutherford 91

Children's conversations and learning science and technology
Mark Cosgrove and Lynette Schaverien 105

Writing for learning in the junior secondary science classroom: issues arising from a case study
Vaughan Prain and Brian Hand 117

Vol. 18 No. 2 March 1996

RESEARCH REPORTS

Children's ideas about ecology 3: ideas found in children aged 5–16 about the interdependency of organisms
John Leach, Rosalind Driver, Philip Scott and Colin Wood-Robinson 129

Seeking the causal connection in electricity: shifting among mechanistic perspectives
Joshua Gutwill, John Frederiksen and Michael Ranney 143

Images of electricity: how do novices and experts model electric current?
Susan M. Stocklmayer and David F. Treagust 163

The electrostatics–electrokinetics transition: historical and educational difficulties
Abdelmadjid Benseghir and Jean-Louis Closset 179

The persistence of students' unfounded beliefs about electrical circuits: the case of Ohm's law
Abdeljalil Métioui, Claude Brassard, Jude Levasseur and Michel Lavoie 193

Using an analogical teaching approach to engender conceptual change
David F. Treagust, Allan G. Harrison and Grady J. Venville 213

Children as experimenters
Karen Meyer and Robert Carlisle 231

Science teaching and reflection: incorporating new subject-matter into teachers' classroom frames
Arthur N. Geddis 249

Vol. 18 No. 3 April–May 1996

GENERAL ARTICLES

Science, technology and mathematics: the problem of developing critical human capital in Africa
M. B. Ogunniyi 267

The four horsemen of Islamic science: a critical analysis
S. P. Loo 285

RESEARCH REPORTS

Constructivism and non-western science education research
William W. Cobern 295

Contextualizing science teaching in Swaziland: some student reactions
Fred Lubben, Bob Campbell, and Betty Dlamini 311

Students' alternative frameworks: linguistic and cultural interpretations based on a study of a western-tribal continuum
Patrick P. Lynch 321

Biology education in Germany: research into the effectiveness of different teaching methods
Wilhelm Killermann 333

Kids, cars and conservation: children's ideas about the environmental impact of motor vehicles
Debbie Batterham, Martin Stanisstreet and Edward Boyes 347

The system idea as a tool in understanding conceptions about the digestive system
Jayashree Ramadas and Usha Nair 355

The explanatory role of spontaneously generated analogies in reasoning about physiological concepts
David R. Kaufman, Vimla L. Patel and Sheldon A. Magder 369

Vol. 18 No. 4 June 1996

GENERAL ARTICLE

A new scoring procedure for the *Views on Science–Technology–Society* instrument
Peter A. Rubba, Cristine S. Bradford and William J. Harkness 387

RESEARCH REPORTS

Use of classroom environment perceptions in evaluating inquiry-based computer-assisted learning
Dorit Maor and Barry J. Fraser 401

Interactions in an open-inquiry physics laboratory
Anita Roychoudhury and Wolff-Michael Roth 423

Teaching biology in a group mastery learning mode: high school students' academic achievement and affective outcomes
Reuven Lazarowitz, J. Hugh Baird and Val Bowlden 447

Alternative conceptions in Galilean relativity: distance, time, energy and laws
Jayashree Ramadas, Shrish Barve and Arvind Kumar 463

Beliefs regarding force and motion: a longitudinal and cross-cultural study of South African school pupils
L. G. Enderstein and P. E. Spargo 479

The peer interview about complex events: a new method for the investigation of preinstructional knowledge
David J. Hamilton 493

Vol. 18 No. 5 July–August 1996

REFEREES LIST

Referees for *IJSE* 507

GENERAL ARTICLE

Some research issues and findings concerning funding policy for science and mathematics education in South Africa
Michael Kahn 511

RESEARCH REPORTS

Reasoning strategies of students in solving chemistry problems as a function of developmental level, functional M-capacity and disembedding ability
Mansoor Niaz 525

A general strategy for solving high school electrochemistry problems
Kam-Wah Lucille Lee and Peter J. Fensham 543

The secret life of the chemical bond: students' anthropomorphic and animistic references to bonding
Keith S. Taber and Mike Watts 557

Measurement of the confidence, attitudes, and self-image of Turkish student-teachers in relation to chemistry education
Eralp H. Altun and Satilmis Kaya 569

Changes in perceptions and attitudes of pre-service post-graduate secondary school science teachers
Nir Orion and David B. Thompson 577

An analysis of teacher questioning behaviour in constructivist primary science education using a modification of a descriptive system designed by Barnes and Todd (1977)
Dorothy Watt 601

Alternative conceptions in Galilean relativity: inertial and non-inertial observers
Jayashree Ramadas, Shrish Barve and Arvind Kumar 615

Vol. 18 No. 6 September 1996

RESEARCH REPORTS

Metaphorical understandings and scientific ideas
Jon Ogborn and Isabel Martins 631

Intuitive rules in science and mathematics: the case of 'more of A – more of B'
Ruth Stavy and Dina Tirosh 653

Intuitive rules in science and mathematics: the case of 'Everything can be divided by two'
Dina Tirosh and Ruth Stavy 669

Children's astronomical beliefs: a preliminary study of Year 6 children in south-west England
John G. Sharp 685

Children's ideas on light and vision
N. J. Selley 713

Forging the visions: senior school science education across Australia
Jim Butler, Warren Beasley and Donna Satterthwait 725

Students' alternative frameworks for the nature of matter: a cross-cultural study of linguistic and cultural interpretations
Patrick P. Lynch 743

Vol. 18 No. 7 October–November 1996

PRACTICAL WORK IN SCHOOL SCIENCE

Editorial 753

Practical work in school science: exploring some directions for change
Derek Hodson 755

The link between the laboratory and learning
Richard T. White 761

Preordained science and student autonomy: the nature of laboratory tasks in physics classrooms
Timothy P. Olsen, Peter W. Hewson and Lyman Lyons 775

Practical work: its role in the understanding of evidence in science
R. Gott and S. Duggan 791

When the black box springs open: practical work in schools and the nature of science
Mick Nott and Jerry Wellington 807

RESEARCH REPORTS

Early learning about light: mapping preschool children's thinking about light before, during and after involvement in a two week teaching program
Marilyn Fleer 819

Towards a phenomenography of light and vision
N. J. Selley 837

Students' conceptual change in geometrical optics
Igal Galili 847

Student teachers' use of analogies in science instruction
Ruth Jarman 869

Vol. 18 No. 8 December 1996

DISTINGUISHED PAPERS SERIES

Signor Galileo Galilei's scales
Gianni Bonera 881

GENERAL ARTICLES

New trends in science education
Daniel Gil-Pérez 889

Same place, different experiences: exploring the influence of gender on students' science museum experiences
Linda Ramey-Gassert 903

METHODOLOGICAL ISSUES

The dimensionality of attitude scales: a widely misunderstood idea
Paul L. Gardner 913

The internal consistency of a concept mapping scoring scheme and its effect on prediction validity
Xiufeng Liu and Mike Hinchey 921

RESEARCH REPORTS

An explanatory gestalt of essence: students' conceptions of the 'natural' in physical phenomena
Mike Watts and Keith S. Taber 939

Children's ideas about the reliability of experimental data
Fred Lubben and Robin Millar 955

The 'gender fairness' of integrated science textbooks used in Jamaican high schools
Peter Whiteley 969

Understanding technology: the development of a concept
Tina Jarvis and Léonie J. Rennie 977

A holistic approach to preparing disadvantaged students to succeed in tertiary science studies. Part I. Design of the Science Foundation Programme (SFP)
Diane J. Grayson 993
